

Priya Nair

Computer Science Undergraduate • Seeking Software Engineering Internship

priya.nair@gmail.com | +91 98201 47382 | linkedin.com/in/priyanair-cs | github.com/priyanair | Bangalore, India

OBJECTIVE

Passionate third-year Computer Science student with hands-on experience in full-stack development and machine learning through hackathons and personal projects. Looking for a summer 2026 software engineering internship where I can apply my skills and grow alongside experienced engineers.

EDUCATION

B.E. Computer Science & Engineering | *RV College of Engineering (VTU)* Aug 2022 – May 2026 (Expected) • Bangalore, India

CGPA: 8.9 / 10 • Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Machine Learning

HACKATHON EXPERIENCE

Winner — Smart India Hackathon (SIH) 2024 | *National Finals, Ministry of Education* Sep 2024 • New Delhi

- Built 'GramSeva', a multilingual civic grievance portal for rural India, using React, Node.js and a custom NLP pipeline for Kannada + Hindi text classification.
- Delivered a working prototype in 36 hours; selected from 1,200+ national submissions. Presented to a panel of 8 judges including senior government officials.
- Integrated speech-to-text (Whisper API) enabling voice-based complaint filing for low-literacy users — identified as the standout feature by the judging panel.

2nd Place — HackBangalore 4.0 | *Hosted by Microsoft Reactor & NASSCOM* Mar 2024 • Bangalore

- Developed 'StudySync', an AI-powered collaborative study planner that uses GPT-4 function calling to generate personalised revision schedules from uploaded syllabi.
- Built the backend in FastAPI (Python) and deployed on Azure App Service within a 24-hour window; integrated GitHub OAuth for seamless sign-in.
- Acquired 60+ beta users within 48 hours of the live demo link being shared; received follow-up interest from two edtech startup mentors.

Participant — ETHIndia 2023 | *Devfolio, Ethereum Foundation* Dec 2023 • Bangalore

- Prototyped a decentralised micro-lending dApp for unbanked users using Solidity smart contracts on Polygon; integrated Chainlink price feeds for INR/MATIC exchange.
- First exposure to Web3 tooling (Hardhat, Ethers.js, IPFS); independently learned the stack over 2 weeks before the event.

PERSONAL PROJECTS

PathfinderAI — Algorithm Visualiser | *Side Project* Jan 2024 – Present

- Interactive web app (React + TypeScript) visualising Dijkstra, A*, BFS/DFS in real time on a user-drawn grid.
- 300+ GitHub stars; featured in a popular frontend newsletter (Frontend Focus Issue #627).

MovieMood — Emotion-based Recommendation Engine | *Side Project* Aug 2023

- Fine-tuned DistilBERT on IMDb reviews to classify sentiment by emotion (joy, sadness, fear, etc.) and built a Flask API serving personalised movie recommendations.
- Achieved 87% accuracy on held-out test set; hosted on Hugging Face Spaces with a Gradio front-end.

TECHNICAL SKILLS

Languages: Python, JavaScript / TypeScript, Java, C, SQL, Solidity

Frameworks: React, Node.js, Express, FastAPI, Flask, Tailwind CSS

Tools & Platforms: Git, Docker (basic), PostgreSQL, MongoDB, Firebase, Azure, Linux/Bash

POSITIONS OF RESPONSIBILITY & ACTIVITIES

- Core Team — RVCE Google Developer Student Club (GDSC), 2023–Present: co-organised 6 workshops on web dev and cloud (250+ cumulative attendees).
- Teaching Assistant — Data Structures Lab, RVCE (Aug 2024 – Present): weekly doubt sessions for 45 second-year students.
- Competitive Programming: Codeforces rating 1,412 (Specialist); solved 380+ problems on LeetCode.
